PROFILE

Born in Rivoli (TO), 29th June 1992. Got close to photography at the age of 12, intrigued by my uncle's camera. Started taking pictures when I felt inspired, improved my skills by expanding my knowledge and listening to professional photographers' advice and especially my uncle. Photography ended up shaping my whole life including the choice of my courses both in high school and University. Started working alongside with professionals at a young age. Particularly passionate and experienced about advertising photography, but experienced in the field of reportage photography as well. Up to now, I have worked on projects both on my own and collaborating with professional photographers, produced reportages for companies, magazines and online newspapers, advertising photography, photo shoots for a variety of different events, from live concerts to birthday parties.
